

How to include references automatically with **natbib**?

Freddy Hernández

September 7, 2017

1 natbib package

natbib is a package to include references in a document easily. The natbib package has two basic citation commands, `\citet` and `\citep` for textual and parenthetical citations, respectively.

Next we have some examples using these commands, on left we have the instruction and after the symbol \longrightarrow we have the results.

- `\citet{einstein}` \longrightarrow Einstein (1905).
- `\citep{einstein}` \longrightarrow (Einstein, 1905).
- `\citet[chap. 2]{einstein}` \longrightarrow Einstein (1905, chap. 2).
- `\citep[chap. 2]{einstein}` \longrightarrow (Einstein, 1905, chap. 2).
- `\citet*{einstein}` \longrightarrow Einstein (1905).
- `\citep{einstein}` \longrightarrow (Einstein, 1905).
